SUMMARY

Discover Ivan Weiss: Engineer, Innovator, Educator. As a Software Developer, I merge a rigorous academic background in Software Engineering with profound real-world experience across development and quality assurance. I excel in harnessing multiple programming languages and automation tools to not only meet but advance industry standards through innovative solutions. Beyond developing software, I'm committed to educating and empowering the next generation of tech professionals, sharing insights and inspiring innovation. Thank you for exploring my journey and contributions to the tech world!

EXPERIENCE

Quality Specialist II - Professional Development and Training

MentorMate

August 2023 - Present, Asuncion, Paraguay

- Engaged in a structured professional development program, enhancing knowledge in QA methodologies and compliance standards.
- Participated in multiple training programs and workshops, gaining proficiency in new tools and technologies including Postman, Charles Proxy, and MongoDB.
- Actively involved in global teams across Paraguay, USA, and Bulgaria, enhancing cross-functional and cross-cultural collaboration languages.
- Helped in the trainings of bootcamps covering API Testing using postman.

Quality Specialist II - Flyte Project

MentorMate

August 2023 - Present

- Oversaw quality assurance for the Flyte Project, focusing on a website, a mobile application and an FDA-cleared device to improve women's pelvic health.
- Collaborated with developers and project managers to ensure seamless integration of new features, maintaining high-quality user experiences.
- Managed detailed documentation efforts to ensure compliance with industry standards and facilitated effective team and stakeholder communication.
- Developed test plans and strategies that ensured product reliability.

QA Engineer and Software Developer

WPG srl.

October 2018 - December 2022

- Performed comprehensive manual and automated testing, ensuring all new software applications met stringent quality standards before release.
- Contributed to various phases of the software development lifecycle, enhancing system designs and functionality with innovative solutions.
- Developed and maintained critical documentation for testing processes and software functionalities, significantly improving future maintenance and upgrades.
- Created a Python-based automation tools to streamline the test data generation and processing for reports.

EDUCATION

Bachelor's Degree in Computer Science

Facultad Politécnica de la Universidad Nacional de Asunción (FP-UNA) • January 2018 - Present

- Completed a rigorous curriculum encompassing a wide range of computer science disciplines from fundamental theories to practical applications.
- Engaged in academic competitions and collaborative certifications that enhanced languages in teamwork, problem-solving, and innovation, achieving top placements in national and international contests.
- Developed proficiency in a variety of programming languages and technical tools through intensive coursework and self-directed learning, preparing for a seamless transition to professional environments.
- Cultivated strong communication and leadership languages through active participation in student councils and as a student mentor, helping to organize major campus events and workshops.

Study Abroad Program

Wichita State University, Kansas, USA • January 2023 - May 2023

- Improved technical communication and project management languages in a diverse cultural environment, working closely with students and faculty from various cultural backgrounds.
- Took specialized courses in Negotiation, Communication, Entrepreneurship, and Marketing from renowned professors, gaining insights into advanced business strategies and interpersonal dynamics.

- Collaborated on interdisciplinary certifications that emphasized scalable software solutions, applying theoretical knowledge to practical challenges.
- Presented a reforestation project called 'Botanic Buddy' at an entrepreneurship competition, showcasing innovative approaches to environmental sustainability.
- Traveled across Kansas, Colorado, Los Angeles, and San Francisco, which broadened my cultural perspective and allowed me to make lasting international friendships.
- Perfected my English language languages through immersive experiences both in academic settings and during travel, enhancing my ability to communicate effectively in diverse environments.
